NOTES:

- The output voltage is set to ±1%, with all the outputs at rated load. And the adjustable range is ±5%.
- Peak output current lasting less than one minute with duty factor less than 5%. During peak loading (total output power must not exceed 45W), output voltage may exceed regulation limits.
- Add a 0.1uF ceramic capacitor and a 10uF E.L. capacitor to the output cable. Peak to peak and RMS metering equipment shall have a 20 MHz response with probes and cables maintaining frequency response from 200 Hz to 100MHz band width. Output ripple and spikes are measured directly at the output terminals of the power supply without the use of the probe ground clip.
- Total regulation is defined as the static output regulation at 25°C, including initial tolerance, line voltage and load current within stated limits.
- Safety pending.
